POU drinking water faucet

Everpure Designer series drinking water faucets deliver a steady stream of premium quality filtered water from Everpure commercial grade water filtration systems. These separate filter faucets are available in eight stunning finishes and colors to match today's high end kitchen faucets.

Everpure Designer Drinking Water Faucets feature:

- > Sleek, versatile design
- > Selection of eight beautiful finishes to match the most popular designer faucets
- > Lead-free
- > Forged brass construction
- > Aerator tip provides even, clear stream of filtered water
- > Ceramic disc type valve
- > 0.5 GPM flow
- > Certified to NSF/ANSI 61
- > RO compatible with the use of a separate air gap

For commercial grade water filtration

It's water filtration you can trust

The same commercial quality that makes Everpure the overwhelming choice for water filtration in restaurants is also available for your home. Everpure's exclusive precoat filtration technology combines Micro-Pure and a unique pleated filter membrane to reduce particles as small as 0.5 microns. This highly engineered design offers the largest filtering surface area, longer life and consistent performance.

the pure solution

Our products polish water to premium quality so that water is sparkling and free of unwanted tastes and odors. You'll taste the difference in every sip and everything made with water will taste better, too.

the convenient solution

Everpure systems are easily installed using common household tools. Our systems mount under your sink and are plumbed to a separate filter faucet. And cartridge replacement is easy, too — just like changing a light bulb.
