

SCS-350

product specifications
Commercial grade drinking water system
for the home

The same quality that makes Everpure® the overwhelming choice for water filtration in restaurants is also available for your home. For use with DACOR, Electrolux and other high end residential Coffee & Espresso brewing appliances.

It's water filtration you can trust

the pure solution

Our products polish water to premium quality so that water is sparkling and free of unwanted tastes and odors. You'll taste the difference in every sip and everything made with water will taste better, too.

the convenient solution

Everpure systems are easily installed using common household tools. Our systems mount under your sink and are plumbed to a separate filter faucet. And cartridge replacement is easy, too — just like changing a light bulb.

the practical solution

At only pennies per gallon, this system is less expensive per glass than bottled water or other drinking water systems and provides about a year's supply of water, depending on the size of your family and the amount of water you drink.

The Everpure SCS-350 Drinking Water System features:

- > Unique 3-stage blending cartridge provides softened, buffered and filtered water
- > High capacity Fibredyne carbon block provides enhanced chlorine taste and odor reduction
- > Small amount of carbon filtered water bypasses softening resin to allow proper initial hardness
- > Reduces hardness in water that can cause minerals to build-up in coffee and espresso equipment
- > Reduces minerals such as calcium and magnesium
- > Reduces chlorine, off tastes and odors
- > Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

SCS-350 Filtration/Decalcification Service Kit

Part Number EV9252-30

- Kit contains all of the components needed to install filtration for new built-in coffee appliances (DACOR and Electrolux brands). These include a QL3 head, JT cartridge, SCS-350 cartridge, bypass plug, Scaleklean, angle stop valve adaptor, special fittings, tubing and instructions.

Standard Decalcification Service Kit

Part Number EV9252-40

- Kit contains all of the components needed by the Service Agent to service existing built-in coffee appliances (DACOR and Electrolux brands). These include a QL3 head, JT cartridge, bypass plug, Scaleklean, special fittings, tubing and instructions.

Commercial grade drinking water system
for the home

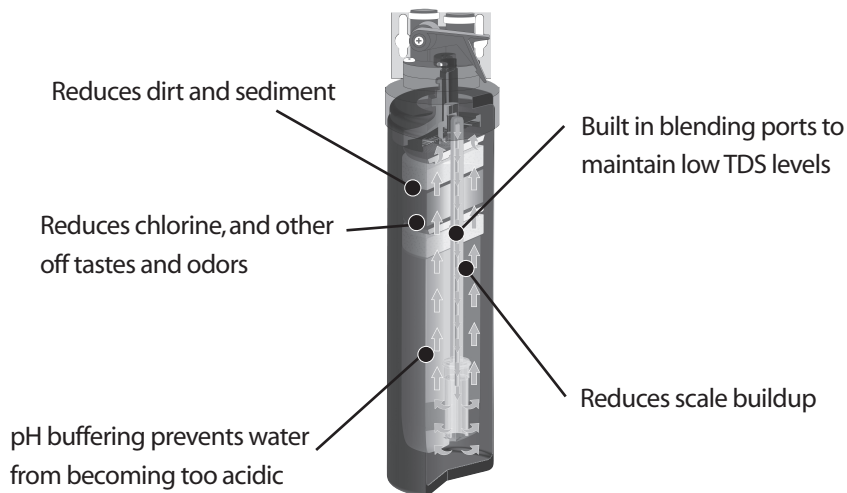

SCS-350 Cartridge - Part No. EV9270-20

Features:

- > Unique 3-stage blending cartridge provides softened, buffered and filtered water
- > Utilizes ion exchange resin with buffering capabilities and high capacity Fibredyne carbon block
- > Small amount of carbon filtered water bypasses softening resin to allow proper initial hardness
- > Reduces hardness in water that can cause minerals to build-up in coffee and espresso equipment
- > Reduces minerals such as calcium and magnesium
- > Reduces chlorine, off tastes and odors
- > Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

General Installation/Operation/Maintenance Requirements:

- > It is recommended that before purchasing a water treatment unit, you have your water tested to determine your actual treatment needs
- > Space required: 5 x 5 x 22 in. (13 x 13 x 56 cm) including 2-1.2 inches of clear space under unit for cartridge change
- > Install vertically with cartridge hanging down
- > Replace cartridges when capacity is reached or when flow becomes too slow, but at least annually
- > Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts
- > Rated service capacity of 150 gallons based on common influent hard water characteristics

SCS-350 Cartridge Capacity		
Influent Grains	Gallons to Changeout	6 oz. Cups
6	300	6400
7	257	5483
8	225	4800
9	200	4267
10	180	3840
11	164	3499
12	150	3200
13	139	2965
14	129	2752
16	113	2411
18	100	2133

This drinking water system must be maintained according to the manufacturer's instructions, including replacement of filter cartridges. The substances reduced or removed by this system are not necessarily in your water. Read the performance data sheet.

flow rate

0.5 gpm (1.9 Lpm)

temperature

35-100 °F (2-38 °C) Cold water use only

pressure

10-125 psi. (0.7-8.6 bar), non shock

capacity

150 gal. (568 L)

Based on common influent hard water characteristics

everpure warranty

Everpure Drinking Water Systems are warranted to be free of defects for a full twelve (12) months after purchase. A detailed warranty statement is provided with each system.
